

GOKUL R

Backend Developer | 8098325047 | Mail | LinkedIn | Chennai

Professional Summary

Motivated Backend Developer and third-year B.Tech student specializing in Artificial Intelligence and Data Science. Strong foundation in Java programming, Object-Oriented Programming (OOPS), and Data Structures & Algorithms with hands-on problem-solving experience. Familiar with backend logic, basic web development, and database concepts. Actively building projects and continuously improving core computer science fundamentals to prepare for software development roles and internships.

Technical Skills

Programming Languages: Java (Core Java, Object-Oriented Programming), Python

Computer Science Fundamentals: Data Structures and Algorithms

Web & Application Development: HTML5, CSS3, Spring Boot, Flask (Basic backend development), Streamlit (Data-driven web applications)

Databases: SQL, SQLite, Relational Database Concepts

Tools & Development Environment: Visual Studio Code, Git & GitHub (Version Control), Postman (Basic API Testing)

Soft Skills: Problem Solving, Time Management, Fast Learner, Adaptability, Team Collaboration

Experience

AI Product Development Intern

Chimertech Private Limited | Nov 2025 – Dec 2025

- Contributed to AI-based product development tasks and backend workflows
- Assisted in data handling, feature implementation, and testing
- Collaborated with technical teams and adapted quickly to project requirements

AI & Data Analytics Intern (Virtual)

AICTE · Shell India · Edunet Foundation | Jun 2025 – Jul 2025

- Completed 4-week internship focused on AI, data analytics, and green skills
- Gained exposure to data preprocessing and AI application workflows

Projects

Employee Management System

Github

Python, Tkinter, MySQL, Pandas

- Developed a desktop-based employee management application with CRUD operations for employee records
- Implemented MySQL database integration for persistent data storage
- Built features for search, update, delete, and CSV export of employee data
- Designed an interactive GUI using Tkinter and ttk themes

Crypto Tracker & Paper Trading Application

Github

Python, Flask, SQLite, REST APIs, HTML, CSS

- Built a web-based crypto tracking platform with real-time market data using external APIs
- Implemented user authentication, email verification, and session management
- Developed a paper trading system to simulate buy/sell trades and portfolio tracking
- Integrated SQLite database for user data, balances, and trade history
- Designed a modern, responsive UI with custom CSS

Education

Rajalakshmi Institute Of Technology, B.Tech Artificial Intelligence And Data
Science

2023 – 2027

- GPA: 8.7/10

Bishop Heber Higher Secondary School

- SSLC: Pass
- HSC: 94.0
